

MovieMania

Premium Cinema Portal with AI-Powered CinemaBot

Presented by: **Ebi Emmerich-Adehor**

Movie Discovery is Fragmented

The Problem

Users often need different websites to:

Find movies

Watch trailers

Get recommendations

Book tickets

Solution

MovieMania combines everything
in one platform.

Project Overview-Cinemabot(MovieMania)

AI Assistant Features

provide instant Movie recommendations

Movie information

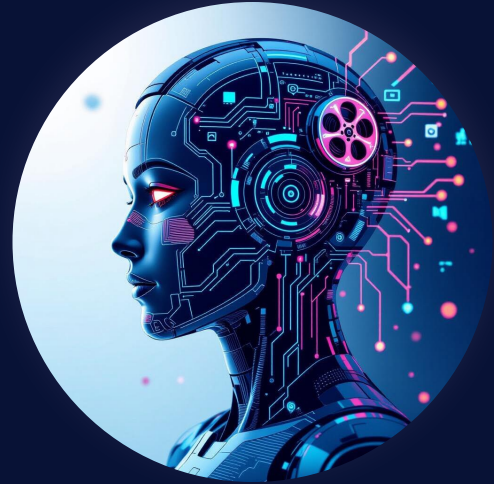

Multi-language support

Conversation memory

Sharing options **and including official Website**

Helps users discover films based on mood, genre, or title

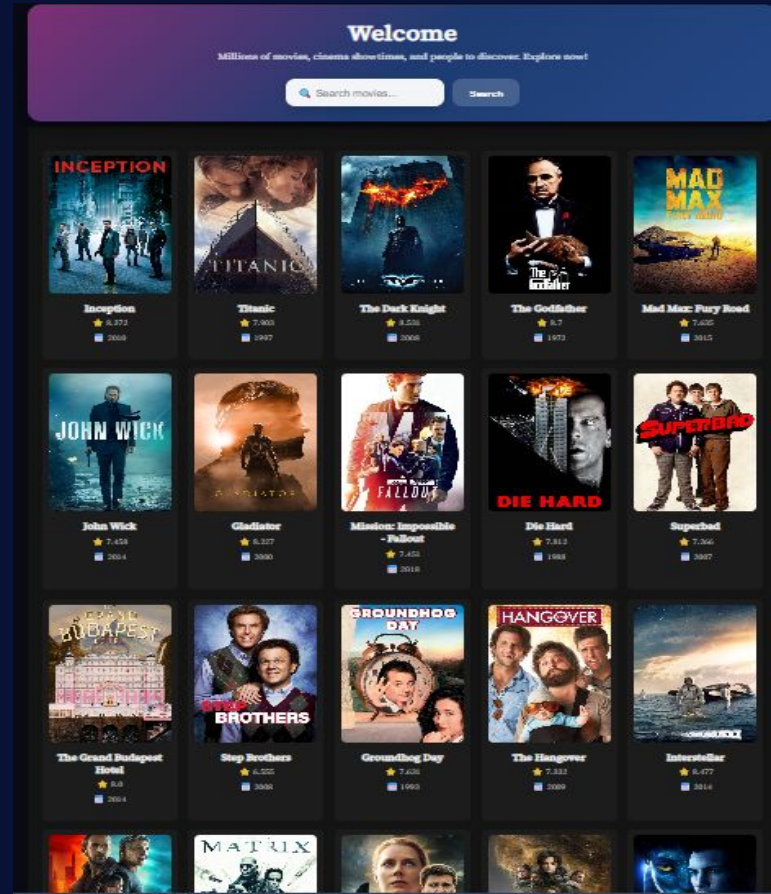

Include direct trailer and movie poster links to watch film

AI-Powered Assistant

Problem Statement

- Users spend too much time choosing what to watch
- Existing platforms are overwhelming
- Recommendations lack personalization

Too many options, fatigue.

Solution & Key Features

- Instant AI-driven movie recommendations
- Mood and genre-based search
- Film summaries and details
- Direct access links

Future Roadmap

Privacy & Security

- Camera-based age verification & parental controls

Personalization & Social Features

- Watchlist alerts for favorite actors/directors
- Collaborative playlists & shared watchlists

Technical Scaling & AI

- Secure authentication
- Real-time payment integration

Vision & Impact

- Personalized AI cinematic experiences
- Improved user engagement
- Enhanced satisfaction and retention
- Future of interactive entertainment
- Increasing sales of cinema concessions

Cinematic Assistant Increasing sales
